

# **SOME ASPECTS OF QUANTUM MECHANICS AND FIELD THEORY ON NONCOMMUTATIVE SPACES**

**THESIS SUBMITTED TO  
JADAVPUR UNIVERSITY  
FOR THE DEGREE OF  
DOCTOR OF PHILOSOPHY (SCIENCE)**

By

**B. MUTHUKUMAR**

**SAHA INSTITUTE OF NUCLEAR PHYSICS  
1/AF, BIDHAN NAGAR  
KOLKATA 700064, INDIA.

2008

## TABLE OF CONTENTS

	<b>Page</b>
Acknowledgements . . . . .	vi
Abstract . . . . .	vii
List of Figures . . . . .	viii
Chapters:	
1. Introduction . . . . .	1
1.1 Motivation and Overview of the Thesis . . . . .	1
1.2 Organization of the Thesis . . . . .	8
Bibliography . . . . .	10
2. Brief Introduction to Noncommutative Theories . . . . .	13
2.1 Landscape of Theories on Noncommutative Spaces . . . . .	13
2.2 Weyl-Wigner Correspondence . . . . .	14
2.3 Groenewold-Moyal Product . . . . .	17
2.4 Deformation of Classical and Quantum Theories . . . . .	20
2.4.1 Classical and Quantum Mechanics . . . . .	20
2.4.2 Field Theories . . . . .	22
2.4.3 Bounds on the Noncommutative Parameter . . . . .	27
Bibliography . . . . .	28
3. Noncommutative Quantum Mechanics in Phase Space . . . . .	32
3.1 Introduction . . . . .	32
3.2 Classical Domain . . . . .	34
3.3 Quantum Domain . . . . .	35

3.3.1	Deformed Products . . . . .	36
3.3.2	Quantum Condition . . . . .	37
3.3.3	Baker's Construction of Integral Equation . . . . .	38
3.3.4	Iterated Quantum Conditions and Integral Equations . . . . .	40
3.3.5	Generic Form of Density Distribution . . . . .	42
3.4	Some Consequences of the Generic Form of Density Distribution . . . . .	46
3.4.1	Weyl-Correspondence . . . . .	46
3.4.2	Quantum and Normalization Conditions Preserving Variations . . . . .	50
3.5	Dynamical Equations . . . . .	51
3.5.1	Generalized Moyal Equation of Motion . . . . .	51
3.5.2	Generalized Heisenberg Equation in Phase Space . . . . .	52
3.5.3	Time dependent Schrödinger Equation . . . . .	52
3.5.4	Heisenberg Equation . . . . .	53
3.6	Eigenvalue Equations . . . . .	53
3.6.1	*-genvalue Equation in Phase Space . . . . .	54
3.6.2	The Case in Hilbert Space . . . . .	59
3.7	Twisted Galilean Symmetry . . . . .	60
3.8	Summary . . . . .	61
	Bibliography . . . . .	63
4.	Noncommutative Oscillators and the Commutative Limit . . . . .	65
4.1	Introduction . . . . .	65
4.2	Harmonic Oscillator . . . . .	65
4.3	Anharmonic Oscillator . . . . .	68
4.4	Summary . . . . .	70
	Bibliography . . . . .	71
5.	Noncommutative Schrödinger Field Theory . . . . .	72
5.1	Introduction . . . . .	72
5.2	Noncommutative Klein-Gordon Theory . . . . .	74
5.3	The Newton-Cartan Spacetime Structures . . . . .	78
5.4	The Magnetic Limit . . . . .	80
5.5	Summary . . . . .	86
	Bibliography . . . . .	88
6.	Summary, Conclusions and Future Outlook . . . . .	90
	Bibliography . . . . .	94

Appendix:

A.	Twisted Space-time Symmetries	95
A.1	Introduction	95
A.2	Twisted Poincaré Transformation	95
A.3	Twisted Galilean Transformation	99
	Bibliography	100
	List of Publications	101
