A STUDY ON THE CRYSTAL STRUCTURE OF BIOLOGICALLY IMPORTANT MOLECULES

Dissertation Submitted for the Degree of Doctor of Philosophy (Science) of the University of Calcutta

By
JIBAN KANTI DATTA GUPTA
SAHA INSTITUTE OF NUCLEAR PHYSICS
CALCUTTA.
JULY, 1971.

<tr>
<td><strong>PREFACE</strong></td>
<td></td>
</tr>
<tr>
<td><strong>ACKNOWLEDGEMENTS</strong></td>
<td></td>
</tr>
<tr>
<td><strong>CHAPTER I</strong></td>
<td>Introduction</td>
</tr>
<tr>
<td><strong>CHAPTER II</strong></td>
<td>Experimental as well as theoretical aspects of various methods usually employed for the determination of crystal and molecular structure</td>
</tr>
<tr>
<td><strong>CHAPTER III</strong></td>
<td>Structure determination of <strong>p-dimethylaminobenzaldehyde hydrobromide</strong></td>
</tr>
<tr>
<td>Preparation of the compound and growth of single crystals</td>
<td></td>
</tr>
<tr>
<td>Cell dimensions and space group</td>
<td></td>
</tr>
<tr>
<td>2-D analysis</td>
<td></td>
</tr>
<tr>
<td>A) Data reduction</td>
<td></td>
</tr>
<tr>
<td>B) Location of heavy atom</td>
<td></td>
</tr>
<tr>
<td>C) Analysis of the structure by minimum function plot and Fourier synthesis</td>
<td></td>
</tr>
<tr>
<td>3-D analysis</td>
<td></td>
</tr>
<tr>
<td><strong>CHAPTER IV</strong></td>
<td>Refinement of the structure of <strong>p-dimethylaminobenzaldehyde hydrobromide</strong></td>
</tr>
<tr>
<td>Bond lengths and angles and their standard deviations</td>
<td></td>
</tr>
