

# Electronic Transport Properties of Nanowires

Thesis submitted to the  
University of Calcutta  
for the degree of  
DOCTOR OF PHILOSOPHY (SCIENCE).

by  
**Atikur Rahman**

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Nanowire - a Quasi One-Dimensional system . . . . .	1
1.2	Electronic Transport Properties: effect of interactions and disorder . .	2
1.2.1	Mott Transition . . . . .	3
1.2.2	Anderson Transition . . . . .	5
1.2.3	Electronic Transport in Disordered Interacting System . . . . .	8
1.2.4	Speciality of One Dimension . . . . .	13
1.3	Conducting Polymer Nanowire: a quasi-1D model system . . . . .	21
1.3.1	Polymer Basics . . . . .	21
1.3.2	Conjugated Polymers . . . . .	24
1.3.3	Charge excitations: Solitons, Polarons and Bipolarons . . . . .	26
1.3.4	Electrical Conductivity of Bulk Conducting Polymer . . . . .	30
1.3.5	Conducting Polymer Nanowires . . . . .	33
1.3.6	Outline of this Thesis . . . . .	34
<b>2</b>	<b>Experimental Techniques</b>	<b>36</b>
2.1	Growth of Polymer Nanowires . . . . .	36
2.1.1	Chemical Synthesis . . . . .	38
2.1.2	Electro-Chemical Synthesis . . . . .	39
2.2	Low Temperature Measurements . . . . .	42
2.3	Other Techniques . . . . .	49
2.3.1	Electron Microscopy . . . . .	49
2.3.2	Secondary Ion Mass Spectroscopy . . . . .	51

2.3.3	Magnetron Sputtering . . . . .	53
<b>3</b>	<b>Ratchet Effect</b>	<b>55</b>
3.1	Introduction . . . . .	55
3.2	Results & Discussion . . . . .	56
3.3	Conclusions . . . . .	66
<b>4</b>	<b>Wigner Crystallization in Polymer Nanowires</b>	<b>67</b>
4.1	Introduction . . . . .	67
4.2	Charge Density Wave like behavior . . . . .	68
4.2.1	Results & Discussion . . . . .	68
4.2.2	Absence of Charge Density Wave like behavior in Electrochemically Synthesized Nanowires . . . . .	81
4.3	Nature of the sliding & non-sliding state . . . . .	84
4.3.1	Noise Characteristics: . . . . .	84
4.3.2	Metal-Insulator transition: . . . . .	87
4.3.3	Effect of Magnetic field: . . . . .	88
4.3.4	Appearance of Negative capacitance: . . . . .	92
4.3.5	Phase diagram: . . . . .	95
4.4	Frictional Dissipation of moving Correlated Charges in Nanowires . . . . .	98
4.4.1	Results & Discussion . . . . .	99
4.5	Bias dependent cross-over from VRH to Power-law behavior . . . . .	109
4.5.1	Results & Discussions . . . . .	109
4.6	Conclusions . . . . .	117
<b>5</b>	<b>Glassy Dynamics of Charge Carriers</b>	<b>118</b>
5.1	Introduction . . . . .	118
5.2	Low Frequency measurements . . . . .	121
5.2.1	Results & Discussion . . . . .	121
5.3	High Frequency measurements . . . . .	132
5.4	Conclusions . . . . .	136

<b>6 Application of Polymer Nanowires</b>	<b>137</b>
6.1 Polymer Nanowire as Memory Devices . . . . .	137
6.1.1 Introduction . . . . .	137
6.1.2 Results & Discussion . . . . .	138
6.2 Conclusions . . . . .	145
<b>7 Summary</b>	<b>146</b>
<b>Bibliography</b>	<b>148</b>
<b>LIST OF PUBLICATIONS :</b>	<b>167</b>
