

ASPECTS OF GRAVITY IN HIGHER DIMENSIONS

**THESIS SUBMITTED TO
JADAVPUR UNIVERSITY
FOR THE DEGREE OF
DOCTOR OF PHILOSOPHY (SCIENCE)**

By

**SAYAN KUMAR CHAKRABARTI
SAHA INSTITUTE OF NUCLEAR PHYSICS
KOLKATA**

AUGUST 2009

TABLE OF CONTENTS

	Page
List of Figures	v
List of Tables	viii
Chapters:	
1. Introduction	1
1.1 Motivation	1
1.2 Quasinormal modes of black holes	5
1.2.1 Black hole perturbation and definition of QNM	6
1.2.2 Different techniques for computing QNMs	12
1.2.3 Applications of QNMs	17
1.3 Entropy and normal modes of black holes	20
1.4 Plan of the thesis	24
2. Quasinormal Modes of Vector and Tensor perturbations of Gauss-Bonnet Black Holes	26
2.1 Introduction	26
2.2 Tensor and vector perturbation of spherically symmetric Gauss-Bonnet space-time and the Gauss-Bonnet black hole	30
2.2.1 Uncharged Gauss-Bonnet Black Hole	32
2.2.2 Charged Gauss-Bonnet Black Hole	32
2.3 QNM using WKB method and results	33
2.4 Discussion	44
3. Dirac Quasinormal Modes of Charged Black Holes in Higher Dimensions	46
3.1 Introduction	46
3.2 Charged Black Holes in Higher Dimensions	48
3.2.1 Reissner-Nordström type solutions	49

3.2.2	Charged Gauss-Bonnet black hole	50
3.3	Dirac Equation in spherically symmetric higher dimensional black hole background	51
3.4	QNM using WKB method and results	53
3.5	QNM in large multipole number limit	65
3.6	Discussion	66
4.	Asymptotic Quasinormal Modes of d Dimensional Schwarzschild Black Hole with Gauss-Bonnet Correction	68
4.1	Introduction	68
4.2	The d -dimensional Schwarzschild metric with the Gauss-Bonnet term in the weak coupling limit	71
4.3	Asymptotic Quasinormal Modes	73
4.4	Discussion	78
5.	Universal near-horizon conformal structure and black hole entropy	81
5.1	Introduction	81
5.2	Scalar field probe of the near-horizon geometry of BTZ black hole	83
5.3	Universal near-horizon geometry for a large class of black holes	85
5.4	Near-horizon structure of different black hole backgrounds	87
5.4.1	Asymptotically flat black hole geometries	87
5.4.2	Asymptotically non-flat black hole geometries	88
5.5	Algebraic properties of the near-horizon KG operator	90
5.6	Representation theory	91
5.7	Central charge and black hole entropy	94
5.8	Discussion	95
6.	Scalar field dynamics in black hole background	97
6.1	Introduction	97
6.2	Normal modes with brick wall boundary condition	99
6.3	Normal modes with generic boundary conditions	105
6.4	Discussion	109
7.	Conclusion and outlook	110
Appendices:		
A.	The WKB method for obtaining black hole QNMs	114

B. Sample MATHEMATICA program to determine QN frequencies for the higher dimensional Reissner-Nordström black hole	120
Bibliography	125
List of Publications	142
